

# INFORMATION PACK: HYBRID SUPA SLATS

**Pioneering hybrid design combining rubber and non-slip concrete.**

- Provides cows with exceptional comfort and grip.
- Minimum 10 year design life.
- Long lasting.
- Easy replaceable rubber cassette.
- Hooves kept in optimum condition means reduced vets' bills.
- Allows for more natural & confident cow movement and behaviours resulting in improved overall animal welfare.
- High number of drainage holes in the rubber ensure rapid dispersal of solids and liquids, keeping floors cleaner and drier.
- Future-proof design. A robust, long-lasting asset that allows farmers to embrace future modifications and innovations without needing to change the slats.
- 10 tonne axle loading to accommodate the ever increasing demands and size of farm vehicles.
- Length options 4500mm/4800mm (15' 0"/16' 0").
